

Stream Alert Quick Start Guide

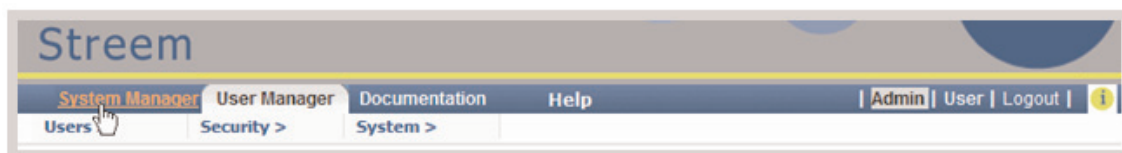

Setting Confirmations to Print or Email on Xerox Devices

When setting up devices, fax confirmations can be set to print out on the device or to be sent to an email account instead. The following steps show where this configuration is set in Stream.

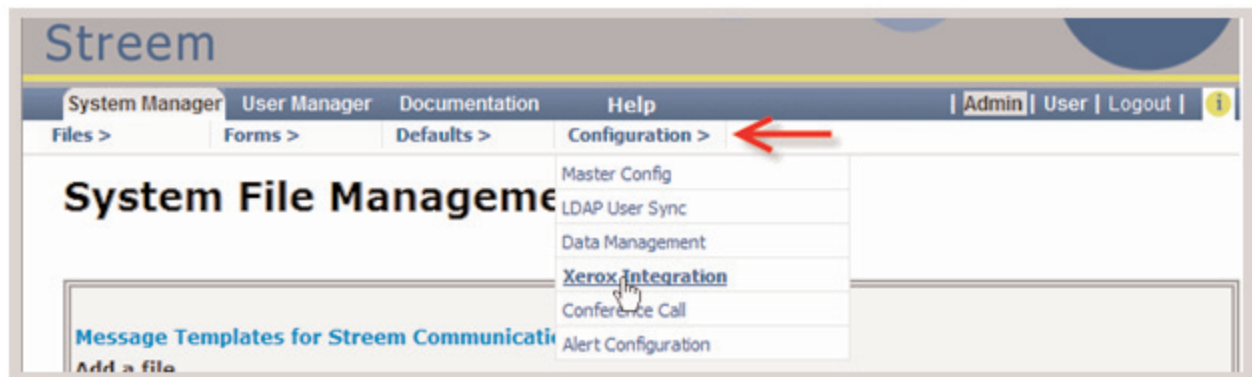

Begin by logging on to your Stream System web interface. Select the Admin function on the main Stream Center page.

Select 'System Manager'.

Select 'Configuration' and 'Xerox Integration' in the drop down menu.

The Xerox Device Integration Page will appear.

Most of the information on this page is entered during the installation of Stream.

To set Confirmations, follow the steps below.

Email Confirmation Field: If confirmations are to be set to print out at the device, type zero '0' in the Email Confirmation field. To set a confirmation to be sent to email, type '1' in the Email Confirmation field.

Email Domain Field: Leave this field blank if the confirmation is to be sent to the user's email address as provided in the user's account in Stream (i.e. email address used to login to Stream Alert). In case user accounts are not defined in Stream, or if the confirmation is to be sent to a specific domain other than the login, please type in the name of the domain in the field.

Setting	Value	Description
SubmitFailedTemplate	C:\stream\Xerox\SubmitFailed	Xerox template to use for failed submissions
