

# CLEO Community Management

## A Quick Look at CLEO VLTrader™

The thought of managing your community of trading partners, branch offices or suppliers shouldn't imply more work. In fact, CLEO VLTrader's Community Management solution will lighten your workload, while adding more security, reliability and customization than you've ever imagined.

### Take Control of Your Networks. On-Board and Manage . . . Today!

Whether your company is large or small . . . whether you have full, partial, or limited community control, you can leverage all or any of the CLEO Community Management solution. CLEO VLTrader's ability to deploy networks that are client and partner ready is second to none. Remote client software can be customized, deployed and auto-configured from the start – leaving your partner with little to do but connect. If you want more control, CLEO VLTrader allows completely configured connections that handle schedules, actions and certificates on behalf of trading partners. It's time to make inefficient certificate management a thing of the past. Using the Certificate Management capabilities in CLEO VLTrader, users can email certificates to trading partners, notify stakeholders of nearing expirations, allow for multiple active certificates during transitions and schedule certificate activation . . . all while supporting AS2 Certificate Exchange with Drummond Certification. Security is a must and CLEO VLTrader has you covered. Protect the perimeter of your business with CLEO VLProxy,™ allow files to be encrypted in transit (SSL, PKI, PGP) and at rest, enforce single sign-ons (LDAP), enforce FIPS I40-2 and audit users with usage statistics, in one easy-to-use solution.

### Exceed Expectations Today and Tomorrow. Customize, Grow and Control.

User interface expectations have entered the realm of personalization. CLEO VLPortal allows clients to view a customized web portal that supports brand standards and improves the user experience with a new software solution. Ad hoc communications can be managed through CLEO VLPortal's customized web portals – to backup other communications methods or serve as a primary method. Content can be customized with relevant information and documentation, ensuring those you do business with can get you what you need, just how you need it. As your community grows, CLEO VLTrader grows with you. Continuous availability and high performance provide load-balancing across multiple CLEO VLTraders and automatic synchronization, giving you centralized visibility to monitor traffic, configure user groups and server pools. Start with only a few connections or plan for exponential future growth with unlimited connections – ensuring your growth is efficient, cost-effective and under control.

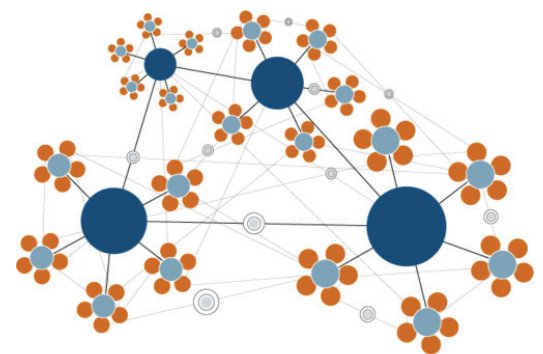

Put CLEO VLTrader to Work for You, Today!  
And, Let Your Communities Grow . . . Securely, Reliably and Efficiently.
