

CLEO LexiCom

Secure File Transfer Client

Connecting to multiple endpoints, while managing your company's security, can be a daunting task. Meeting each vendor's communications requirements, mandates and schedules makes the process even more involved. CLEO LexiCom™ offers a comprehensive array of protocols and security features to meet your needs in an easy-to-use package.

Connectivity & Security

- ▶ Protocol support for AS2, AS3, ebMS 2.0 (ebXML Messaging Service), *fasp*™ FTP, FTPs, SSH FTP, HTTP, HTTPS, IBM® WebSphere® MQ, MLLP, OFTP, OFTP2, RNIF, SMTP, SMTPs and Web Services.
- ▶ Drummond certified for AS2, AS3 and ebMS (ebXML Messaging Service) to provide interoperability. We participate in each round of testing, as well as all optional tests.
- ▶ Encryption algorithms for RC/2, RC/4, Triple DES and AES families.
- ▶ MIC algorithms for MD5, SHA1 and SHA2 families.
- ▶ Self-signed certificate generation allows private key sizes up to 4,096.
- ▶ PGP and XML encryption deliver additional security over most protocols.
- ▶ PGP and XML encryption of data files on the local system.
- ▶ Optional CLEO VLProxy component manages connections in the DMZ while keeping your data and network secure.

Ease of Use

- ▶ Platform support for Windows, Linux, UNIX® and AS/400 operating systems.
- ▶ More than 800 pre-configured connections ensure you can connect to popular trading networks, including Walmart, Target, Food Lion, Home Depot, Honda and more.
- ▶ Tight integration into many popular translators, including Trusted Link, Application Integrator, Gentran and more.
- ▶ Optional Web Interface (GUI) provides remote access to the application in real time.
- ▶ Runs in the background as a service/daemon.

Increased Productivity

- ▶ Comprehensive Certificate Manager allows for overlapping certificates and scheduled certificate replacement to meet each of your trading partners needs.
- ▶ Schedule actions to run automatically on file arrival, or at any time or interval to meet your environment's requirements.
- ▶ Email notification on successful or failed transfers to monitor status remotely.
