### Local, state, and federal agencies can improve information flow with multiple messaging methods

A Cleo Streem solution is a complete messaging platform that improves the way departments and teams move and gather data. By enabling cost-effective — and cost-cutting — desktop faxing, Cleo Streem is the solution for your indispensable fax-based workflows.

More than a fax solution, the Cleo Streem technology stands apart in the marketplace enabling local, state or federal governments to improve multiple messaging methods. Whether sending one message to a large group or an interactive, personalized message to one person, the Cleo Streem solution allows users to reach their audience via phone, email, text or fax. IT departments that have done their research know that Cleo Streem product is a versatile, well-rounded solution for any size government.

## How Cleo Streem can Improve Fax Workflows in Government

- Tie all your multifunction devices together to create a centralized communications platform, providing substantial cost savings, security, and convenience.
- A centrally controlled database helps make enterprise-wide contact maintenance and editing quick and easy.
- Allow inbound faxes to arrive directly into a recipient's inbox, a network folder, or a document management system. Still need a hard copy? Cleo Streem can integrate with multifunction devices to receive those as well.
- Manual outbound faxing wastes employees' time and increases the cost of consumables. By automating the workflow, companies can trim the hard and soft costs incurred for their critical fax communications.

## Possible Uses for Cleo Streem Notification Features

**City and community-wide alerts:** Notify employees and citizens of building, road, or community closings, class cancellations, or special events with minimal effort from staff.

**Voice surveys:** Deliver interactive surveys to employees, residents, constituents, or vendors in a timely, cost-effective fashion. See real-time feedback on reports generated upon completion of the survey so you can act quickly on the gathered data.

**Critical alerts:** Alert staff, fire, or police departments and first responders in the event of an emergency.

**Appointment reminders:** Help your work crew or staff be more efficient by calling ahead before traveling to an appointment to make sure residents are there.

**Automated professor or staff callback:** Automatically notify a qualified pool of workers or staff of overtime or job openings with a call that prompts them to accept or decline the assignment. Responses are logged and reported to HR in real-time.

**Automate phone trees:** Facilitate immediate staff callouts for quick, efficient crew assembly.

### About Cleo

Companies need to move data both within their enterprise and beyond. They want to view data insights and act with informed decisions. Cleo makes it easy! With more than 35 years of experience and more than 100,000 proven and tested installations worldwide, Cleo offers enterprise integration software solutions that are exceptionally easy to install and use. Cleo solutions handle the most comprehensive requirements of enterprise and multi-enterprise integration and include a library of over 800 pre-configured secure connections to speed your implementation. Cleo has solutions for enterprise data integration, enterprise managed file transfer, secure file sharing, and interactive engagement.
