About the PayPal Connector

PayPal enables users to securely send and receive money, make and accept online payments, and set up an online merchant account for digital storefronts. The Cleo Integration Cloud PayPal connector helps you quickly create seamless integrations between PayPal and your ERP, CRM, fulfillment, and finance applications. Keep data aligned between PayPal and your business-critical systems and applications.
Cleo's PayPal connector provides APIs so you can take action

<table>

| Transactions   | • Retrieve a transaction  
                    • Complete a refund for a completed payment transaction |

About Cleo Integration Cloud

Cleo Integration Cloud is a single, hybrid ecosystem integration platform available as a service in cloud and on-premise deployments. Its flexible architecture lets you choose between self-service or managed service models, enabling you to connect, transform, integrate, orchestrate, and analyze end-to-end application, B2B, and data integrations for improved visibility across your business ecosystems. Cleo Integration Cloud empowers technical and business personas to make better decisions, create stronger relationships with your trading partners, drive business continuity and accelerate growth as integration requirements change.

No matter the integration, Cleo's got you covered.
