

OVERVIEW

CIC Engine is the runtime engine at the core of Cleo's CIC platform. CIC Engine consists of a Protocol Engine for connectivity and an Integration Engine for any-to-any data transformation, which together provide intelligent orchestration and powerful automation of mission-critical API and B2B-based integration processes spanning trading partners, cloud applications, and on-premise business systems.

BENEFITS

1. Always-on technology to support always-on demand

Meet elevated customer demands and support business 24/7 with enterprise-grade service level commitment of 99.95% uptime

2. Meet trading partner demands

Rapidly roll out requirements from new or existing trading partners to support continuous delivery to your business teams

3. Eliminate Complexity

Take advantage of a single integration engine that is specifically designed to support API, EDI, or non-EDI based B2B transactions

4. Scale Faster Than Ever

Hyper-scalable integration that helps drive multichannel growth, expand operational capacity, and capture increasing demands stemming from eCommerce or other digital revenue streams

KEY FEATURES

Enable batch and real-time

Instrument and automate batch and streaming processes on a single platform and support end-to-end business processes built on B2B and API-based integration

Gain robust connectivity

Utilize robust, secure protocols and communications standards to design and orchestrate end-to-end dataflows between all your trading partners and internal systems

Leverage high-performance any-to-any transformation

Support extensive mapping, translation, and any-to-any integration requirements with flexible, high-performance data transformation utilizing a comprehensive library of data syntaxes

Bridge the gap to connect internal systems

Migrate workloads to the cloud and extend hybrid integration to support legacy systems through intelligent orchestration and secure connectivity to on-premise file servers, databases, and non-API-based applications

Empower your ecosystem

Bolster business across your ecosystem with partner mailbox connectivity and runtime automation to help streamline people-to-system integration processes

Build, deploy, run

Empower business and technical users with runtime process automation that generates contextually rich data viewable in real-time operational visibility with technical drilldowns and actionable insight

Recognized “Leader” in iPaaS and EDI categories on G2 Crowd

About Cleo Integration Cloud

[Cleo Integration Cloud \(CIC\)](#) is a cloud-based integration platform, purpose-built to design, build, operate and optimize critical ecosystem integration processes. The CIC platform brings end-to-end integration visibility across API, EDI and non-EDI integrations that gives technical and business users the confidence to rapidly onboard trading partners, enable integration between applications, and accelerate revenue-generating business processes. On the platform, businesses have the choice of self-service, managed services, or a blended approach – ensuring complete flexibility and control over their B2B integration strategy.
