

Accelerator

EPI
NetSuite-to-X12

Take control of your revenue-generating operations with streamlined orders, predictable fulfillment, and correct invoicing

Accelerate your time to revenue

Realize a faster-than-ever time to market with prebuilt Order-to-Cash (O2C) business process integration flows

Remove the operational blindfold

Gain real-time business process visibility for actionable operational business insight and technical drilldowns

Configure. Don't code.

Shield your business from complexity and optimize cash cycle times with out-of-the-box process automation without coding

What is an Accelerator?

Accelerators bring together application, business process and industry domain expertise to the core engine and platform applications of Cleo Integration Cloud (CIC).

Accelerators provide the industry's only prebuilt, end-to-end integrations with out-of-the-box business logic between your core business system (ERP, TMS, WMS) and ANSI X12, building the foundation for you to rapidly scale your trading partner ecosystem.

Prebuilt integration flows		Order Capture	Order-to-Invoice	Order-to-Cash
Order Capture	Import Purchase Orders from trading partners to Oracle NetSuite (850)	✓	✓	✓
Fulfilment	Export Item Fulfillments from Oracle NetSuite to trading partners (856)	✓	✓	✓
Functional Acknowledgements	Functional Acknowledgements (997)	✓	✓	✓
Invoicing	Export Invoices from Oracle NetSuite to trading partners (810)		✓	✓
Order Response	Export Purchase Acknowledgements from Oracle NetSuite to trading partners (855)			✓

KEY BENEFITS & CAPABILITIES

Automate your O2C business process

Prebuilt integration flows help streamline and automate O2C processing for seamless business with retailers and other customers

Handle B2B fulfillment the right way

Timely and accurate Advance Shipment Notification (ASN) delivery gives you stronger trading partner compliance and better customer outcomes

Optimize the full cash cycle

Recognize revenue faster by ensuring NetSuite-generated Invoices are correct and get delivered to retailers, wholesalers, and other trading partners

Resolve exceptions faster

Proactive and configurable alert notifications help you solve issues around orders, protect operational SLAs, and meet elevated customer expectations

Jump start your trading partner network

Cleo's implementation experts kick start your time to value, onboarding trading partners more quickly and getting revenue-critical integrations to go-live with confidence

Take operational insights to new heights

Get end-to-end business process visibility for O2C with real-time operational Dashboards, Messages, Jobs, Acknowledgements, and technical drill downs

Say goodbye to EDI chargebacks

Protect margins and prevent rejections to mitigate against chargebacks with out-of-the-box message validation and duplicate checks

Give your B2B sales a boost

Add new sales channels quickly and expand existing revenue streams by quickly integrating to and automating business processes

Eliminate the trading partner backlog

Scale your business and support rapid growth with reusable and repeatable business process logic that helps digitalize and optimize orders from end-to-end

Easily customize and extend your integrations

Built to run on CIC, Network Accelerators are designed for flexibility so you can easily extend the out-of-the-box orchestrations to meet any integration requirement

Recognized "Leader" in iPaaS and EDI categories on G2 Crowd

About Cleo Integration Cloud

Cleo Integration Cloud (CIC) is a cloud-based integration platform, purpose-built to design, build, operate and optimize critical ecosystem integration processes. The CIC platform brings end-to-end integration visibility across API, EDI and non-EDI integrations that gives technical and business users the confidence to rapidly onboard trading partners, enable integration between applications, and accelerate revenue-generating business processes. On the platform, businesses have the choice of self-service, managed services, or a blended approach – ensuring complete flexibility and control over their B2B integration strategy
